Experience: 10 years as a professional Mac and iOS software engineer

Expertise: C, Objective-C, Swift, Cocoa, Xcode, Git

Employment:

Underpass for Mac and iOS in the App Store (2016 - Current)

I'm the creator, owner, and sole developer.

Rogue Amoeba Software (2008 - 2016)

I was lead developer of Airfoil, Airfoil Satellite (formerly Airfoil Speakers), and Radioshift. I was co-lead developer of Intermission and Pulsar. I also wrote large amounts of shared framework code that ships in every Rogue Amoeba app.

5 year anniversary: [Another Momentous Occasion](#)

Guest blog post: [Sierra and Gatekeeper Path Randomization](#)

Farewell: [Rogue Amoeba's 2016](#)

"eight years of rock-solid code inside just about every one of our apps"

FTS InfoTech (2007 - 2008)

I worked on Apple internal Cocoa applications such as Espresso, Merlin, Radar, and Sonar.

Marko Karppinen & Co. (2006 - 2007)

I was lead developer of Knox for Mac. I also worked on Pyro, a Mac client for Campfire chat.

Open Source:

Vienna RSS for Mac

I was lead developer and project administrator.

ClickToFlash WebKit Plug-in

I contributed numerous git commits to the project.
